

No Surgery, No Downtime No Varicose Veins

Now You Can Stop Living With The Pain Of Varicose Veins.

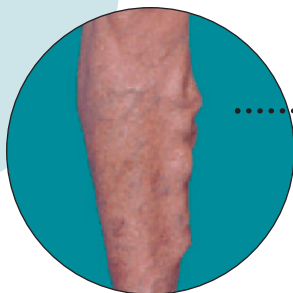

If you've been avoiding treatment for fear the only option is surgery, the news couldn't be better. Now there's a new procedure with no surgery, no downtime and no hospital stay. It's all done as an outpatient procedure in less than two hours with new laser technology much like the kind that's proven so successful in eye surgery, dermatology and other areas of medicine. And your insurance may cover it.

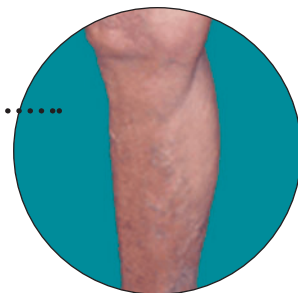

*Initial, pre-treatment
